

ASG Construction Company

## SAFETY POLICY

Building with Safety, Integrity, and Accountability

At ASG Construction Company, we believe that great construction begins with a safe job site. The health and well-being of our team members, clients, subcontractors, and the surrounding community are central to every decision we make. That's why we maintain strict safety standards on every project — from small renovations to full-scale home builds.

### Our Commitment to Safety

We are committed to:

- Creating and maintaining clean, organized, and hazard-free work environments
- Following all federal, state, and local safety regulations, including OSHA guidelines
- Conducting routine safety training and toolbox talks with all team members
- Identifying and eliminating potential risks before they become problems
- Providing proper personal protective equipment (PPE) to all workers
- Ensuring safe use of tools, equipment, scaffolding, and ladders
- Communicating clearly with clients about safety protocols during active projects

## Client and Homeowner Respect

We take care to minimize disruption to your home and your life.

This includes:

- Containing dust and debris with protective barriers and coverings
- Securing work areas from pets, children, and unauthorized access
- Maintaining safe walkways and clear signage where appropriate
- Cleaning work areas daily to ensure neat and safe conditions

## Subcontractor & Vendor Expectations

Everyone who works under the ASG Construction name — including subcontractors and specialty crews — is required to:

- Follow our safety standards and jobsite rules
- Use proper tools and equipment for each task
- Report hazards or concerns immediately to site supervisors
- Participate in pre-work briefings and project-specific training if applicable

## Continuous Improvement

We regularly review and refine our safety procedures to reflect:

- Industry best practices
- Feedback from field teams
- Evolving codes and legal requirements
- Our commitment to zero incidents and long-term health

## A Safe Site Is a Successful Site

Safety isn't just a checklist — it's a mindset. At ASG Construction, we take pride in completing projects not only with craftsmanship and care, but with the confidence that everyone involved goes home safe every day.

If you have any questions about how we ensure safety on your project, we're happy to talk.
